## PROFILE SUMMARY

Salesforce Developer with 4 years of experience specializing in Apex, Lightning Web Components (LWC), Sales cloud and API integration. Proficient in Agile methodology, with hands-on expertise using Azure DevOps (ADO) boards and GitLab for sprint planning, story tracking, and version control. Skilled in designing and deploying scalable Salesforce solutions that enhance business processes and improve user experience. Adept at collaborating with cross-functional teams to deliver high-quality software on time. Committed to continuous learning and applying best practices in Salesforce development to drive organizational success.

## EDUCATION

2022
PG Diploma
**KP Bangalore**

2021
B.Tech/B.E.
**Dr. D. Y. Patil Institute of Technology, Pimpri, Pune**

## WORK EXPERIENCE

May 2022 - Present
Software Engineer
**Boeing**

- Design and develop customized Salesforce solutions using Apex and Lightning Web Components (LWC) to address complex aerospace business challenges.
- Automate and optimize internal Boeing applications by implementing efficient workflows and custom triggers, driving significant improvements in operational efficiency.
- Integrate Salesforce with external enterprise systems via REST and SOAP APIs to ensure seamless and reliable data synchronization.
- Manage defect tracking and feature requests using Azure Boards, facilitating timely resolution within Agile sprint cycles.
- Develop comprehensive unit tests to ensure high code quality and achieve maximum code coverage for all Apex deployments.
- Enhance application security by implementing robust authentication protocols and enforcing data access controls in compliance with Boeing's cybersecurity standards.

## Projects

6 Months
**Smart Real Estate & Property Management Hub**

- Developed a real estate platform on Salesforce inspired by Housing.com, utilizing Lightning Web Components (LWC), Apex, and Flow Builder.
- Designed and implemented three custom objects with Master-Detail and Lookup relationships to optimize data integrity and navigation.

- English
- Marathi
- Hindi

- Created a dynamic Property Marketplace featuring advanced filtering options and an interactive Apply Now modal for seamless user engagement.
- Implemented an Apex Trigger to automate property leasing processes, including auto-leasing approved properties and rejecting competing applications.
- Deployed over 60 property listings and configured a Lightning App with custom navigation tabs, leveraging Salesforce CLI for efficient deployment.
